CAREER SUMMARY

MSI Data Analytics graduate student with a Computer Science background and hands-on experience in Python, SQL, and Java. Proven ability to translate complex datasets into actionable insights, develop impactful tools, and collaborate cross-functionally on technical and research-focused teams.

EDUCATION

University of Michigan ***Ann Arbor, MI***

Master of Science, Data Analytics Major ***Aug 2024 – May 2026***

Relevant Courses: Statistics, Data Manipulation & Analysis, Networks, Data Mining, Natural Language Processing

Georgia Institute of Technology ***Atlanta, GA***

Bachelor of Science, Computer Science Major, Psychology Minor ***Aug 2020 – July 2024***

Relevant Courses: Data Structures & Algorithms, Object-Oriented Programming, Systems & Networks, Design & Analysis of Algorithms, Database Systems, Statistics & Data Analytics, Linear Algebra, Multivariable Calculus, Combinatorics

EXPERIENCE

Graduate Student Instructor at University of Michigan **Jan 2026 – April 2026**

- Support in-class instruction through labs, activities, and discussions for core data science course.
- Hold weekly office hours to help students with programming assignments, data analysis concepts, and projects.
- Grade homework, labs, and projects, providing detailed, actionable feedback to improve students' skills.
- Collaborated with course staff to develop and iterate on course materials.

Instructional Assistant at University of Michigan **Aug 2025 – Dec 2025**

- Designed/refined programming assignments and autograders for introductory Python course to support clear learning objectives.
- Evaluated student submissions and provided detailed feedback to support learning and improvement.
- Assisted in coordinating course logistics across a team of instructors to ensure consistent student experience.

TechOps Analytics Intern at Delta Air Lines **May 2025 – Aug 2025**

- Improved functionality of the supply chain alert system by modifying Python and SQL-based backend logic used to detect things such as overspend and policy violations.
- Designed and deployed a PowerApps application that centralized all alerts, enabling users to filter, sort, and track alerts, resolve issues, add comments, and log money saved. Leveraged AWS, Alteryx, and Excel to analyze data.
- Increased alert visibility and accountability, resulting in improved cross-team resolution workflows.

Research Assistant at University of Michigan **Jan 2025 – April 2025**

- Conducted statistical analysis on older adults' use of ChatGPT to identify behavior patterns and usability gaps.
- Cleaned and transformed datasets using Python (pandas, NumPy) to extract insights.

Data Analytics Intern at Selero **June 2024 – Aug 2024**

- Processed and cleaned large volumes of prescription data using Pandas and NLTK.
- Enabled audit team to detect unsubmitted 340B claims, boosting compliance and recovery potential.

Software Engineering Intern at Delta Air Lines **May 2023 – Aug 2023**

- Built an Android-based solution to locate misplaced cargo handheld devices, reducing equipment downtime.
- Used Java and JavaScript to implement tracking features; generated SQL reports to streamline Flight Ops.

Software Development Intern at EBSCO Information Services **May 2022 – Aug 2022**

- Developed backend features for search enhancement in library systems software.
- Improved search speed and result relevance using Java, SQL, and C within Agile workflows.

SKILLS

Python, Pandas, Java, SQL, AWS, Power BI, Machine Learning, Tableau, PyTorch, scikit-learn, Git, NLP, PowerApps, R, Docker, Alteryx, GitHub, Excel, SAS, NumPy, NLTK, Jupyter, Matplotlib, Seaborn
